

**List of computers**

You will find hereafter all errors or warnings that occurred during the scan of your network. You will also find information about how to fix these issues.

Error**Network path not found**

The scanner was unable to contact the following computers using Windows protocols. Check that these computers are Windows computers and that the File and printer sharing is enabled. You should also check that no firewall blocks needed protocols (NetBIOS TCP 139, SMB TCP 445).
