

EvenTrigger[®]

Windows[®] systems monitoring, alerts and reactions

EvenTrigger[®] permanently monitors Windows[®] event logs and allows you to filter the events that you judge pertinent in helping you to react to, anticipate, correct and prevent problems.

As a specific event occurs, EvenTrigger[®] can automatically trigger, in real time, a corrective action (applications, scripts, etc...) and/or send alerts (e-mail, pop-up or ring alarms). EvenTrigger[®] gives you the ability to foresee and act proactively.

Why buy EvenTrigger[®]?

Send alerts to the administrator

- ▶ Warn the administrator when a backup fails
- ▶ Warn of errors occurring on a server (, AD files, etc...)
- ▶ Inform of a system reboot
- ▶ Alert in case of access attempts to confidential files
- ▶ Alert on detection of a spyware
- ▶ Warn as a session is opened on a server console
- ▶ Inform of a VPN connection
- ▶ ...

Send alerts to users and different services in the enterprise

- ▶ Send a pop-up to warn users of a mail server's unavailability
- ▶ Alert the support team of a hardware failure
- ▶ ...

Trigger corrective actions using scripts

- ▶ Automatically restart a service that suddenly stopped
- ▶ Start file archiving when used disk space reaches 80%
- ▶ Sequence application backups
- ▶ Delete all useless temporary files after a successful backup
- ▶ Resynchronize a system's clock as soon as a time difference occurs
- ▶ ...

Archive events

- ▶ Store in a database all error events that occurred on an application server
- ▶ Archive all the domain controller's errors
- ▶ Report on website access errors
- ▶ ...

Supported Operating Systems

Windows NT4, 2000, XP, 2003
Service Pack 4 and Internet Explorer 5 minimum for Windows NT4

How does EvenTrigger[®] work?

- ▶ EvenTrigger[®] is installed as a Windows[®] service on a Windows[®] system.
- ▶ The administration console allows you to easily configure EvenTrigger[®] using templates.
- ▶ EvenTrigger[®] has a set of 10 predefined filters that you can fine tune, copy and customize.
- ▶ Only a few minutes are necessary to implement a customized filter with an alert and associated action.

EvenTrigger[®] Assets

- ▶ Permanent event log surveillance
- ▶ Increased reactivity in face of problems
- ▶ Capacity to anticipate and even prevent problems before they arise
- ▶ More efficient environment management
- ▶ Predefined reports with filtering and sorting options to facilitate analysis
